

ACS COLLEGE OF ENGINEERING DEPARTMENT OF ECE

A technical talk on “**Nanotechnology and its Applications**” was conducted for the students of ECE by Prof. Mohan Rao.

Nanotechnology is the engineering of functional systems at the molecular scale. This covers both current work and concepts that are more advanced. In its original sense, nanotechnology refers to the projected ability to construct items from the bottom up, using techniques and tools being developed today to make complete, high performance products.

The technical talk thus inspired some students to understand the basic concepts of Nano Technology.
