(Approved by AICTE, New Delhi, Govt. of Karnataka & Affiliated to Visvesvaraya Technological University, Belgaum)

Sponsored by : **MOOGAMBIGAI CHARITABLE AND EDUCATIONAL TRUST**

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences.

One of the major strength of our college is the teaching and learning process. Students receive a right blend of traditional and modern methods to make learning student centric and to give a rewarding experience. Experimental learning, participative learning and problem solving methodologies are adopted to ensure the overall development of students.

1. Experiential Learning

Students are encouraged to take up project work involving latest technologies and use of latest software. Different problems are investigated to a reasonable level by the final year students under the guidance of project guides, within the time frame of the University.

For Real time exposure students are encouraged to participate in inter-collegiate and state level paper presentation and other competitions.

Field visits and Surveys are arranged in academically significant areas.

Industrial visits are organized to academically significant industries to provide exposure to industrial work culture.

Guest lecture by eminent experts from industry and academics are organized to supplement the teaching process and provide experiential learning.

2. Participative Learning

Students are encouraged to participate in professional societal activities like IEEE, ISTE, IETE, etc., The college organizes activities to promote (i) the spirit of Team work through NSS camps, (ii) social responsibility through Red Cross, village Adoption, Tree plantation, Swatch Bharat and Health awareness camp, to help the students learn to lead life as a team for Social and community welfare.

Students are encouraged to take MOOCs (Massive Open Online Courses) offered by premier institutions of the country. They include online lectures, demonstration and interaction through web sessions.

Lab work and workshops are conducted as individual and group work under the supervision of the faculty members.

3. Problem solving Methodology

To develop logical thinking and practical knowledge among the students, case study method is adopted in teaching learning process. This will enhance problem solving ability.

3.2. All questions in the internal tests are based on analysis and reasoning. Free internet access in the library and WI-FI facilities in campus promotes the habit of self-learning and discussion.

Assignments and Quizzes are given at the end of each unit.

Students are involved in the Research activities; product design and development conducted in each Department under the guidance of research scholars, to get knowledge about emerging area and help them to develop research orientation.

Processing fee details (Demand Draft should be drawn from Canara Bank / State Bank of India only):

(processing fee of Rs. 1000/- drawn in favor of Secretary, KSCST, Bangalore - 12)

Demand Draft No. : 502411

Date : 04/02/2021

Bank name : Canara Bank

9.	Date of commencement of the Project : 10/10/2020
10.	Probable date of completion of the project : 21/04/2021
11.	<p>Scope / Objectives of the project:</p> <p>Objectives-</p> <ol style="list-style-type: none">1.To detect the human traffic and social distancing norms using Deep learning techniques and YOLO Version 3 algorithm.2.To Alert the operator if the model encounters violation of social distancing policies.3.Keep record of all the data in the database for further analysis.4. To visualize the data to indicate and predict the COVID-19 outrage based on the social distance violations.
12.	<p>Methodology:</p> <p>The video/image/live feed is given as an input to the YOLO image classification and detection model. The YOLO model will use imagenet architecture to process the image with 156 layers. The model will calculate the Euclidian distance between two points i.e., two persons to measure the distance between them. If the distance is under 2m or 6 feet, it will indicate them as violations and if not, they will be indicated in green color. The model will keep the violation counts, locations of the locality for the further analysis and visualizations.</p>
13.	<p>Expected Outcome of the project:</p> <p>The final YOLO model should be accurately (99.5% accuracy) able to Detect the moving human objects and measure the safe / min distance (2 meter or 6 feet) between them. The model is expected to store the data along with locations to visualize the danger, safe zones on the visual online maps to predict / control the COVID outrage in the localities.</p>
14.	<p>Is the project proposed relevant to the Industry / Society or Institution?</p> <p>:</p> <p>Yes / No :No</p>

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

Report On "Industrial Visit to DiFACTO Robotics and Automation "

The students of Vth semester and VIIth semester of the department of electronics and communication engineering were taken to DiFACTO Robotics and Automation for an industrial visit on 14/10/2019. This visit was conducted as a part of industry interaction where 2 faculty members accompanied the students. The students assembled in the college premises at 9:30 am for boarding the bus arranged as part of transportation from the college and departed for the industrial visit at 10:00 am and arrived at the destination at 11:00 am.

The students were given a brief introduction about robotics and automations and the various types of robots used in industries. The introduction gave the students a brief scope of robotics and automation in industrial applications. The seminar also gave an introduction to the various areas where the company operates. The organisation basically offers turnkey industrial automation systems and industrial solution with robots. It has also established partnership with various companies around the globe.

After the brief introduction the students were taken to the various laboratory present in the company for explaining about automation. The students were introduced to two main types of industrial robots used in the industries ABB and FANUC and were shown live working of these robots which included both human machine interphase and programmable logic.

The Various Tools and Equipment shown were

- [1] Design Software used for solid works
- [2] Assembly and Inspection Tools such as Height gauge, Vernier Callipers, FARO arm

Facilities available and shown to the students:

- [1] 12,000 sq.ft of intergration shop floor area
- [2] Compressed air supply
- [3] 100 KVA power supply
- [4] BIW robotic lines
- [5] Geometric and Respot fixtures
- [6] Automation model change over systems.

Indian Institute of Science

Open Day Visit March 5, 2016

- 1. Type of Event:** IISc Visit for First year Students
- 2. Event Duration:** Open Day (05/03/2016)
- 3. Venue:** Indian Institute of Science, Bangalore
- 4. Outcome of the Program:**

The first year students of all branches of Engineering and the basic science faculties visited IISc on 05/03/2016, open day. The Research activities of all the departments were displayed. The students and the faculties had a good interaction with the researchers. They were able to know the recent research works being conducted in all departments. The students found greater interest in the field of nano science and its applications especially the mechanism of dust free particles in the room. The other interesting application was the unmanned aero vehicle.

The students were very enthusiastic and the visit was motivational for their further study and research.

Report On Site Visit

Department of Civil Engineering had organized a Site Visit on September 26th, 2019, at 11.30 AM to RRGI Studio apartment at kambipura. The Tech -- talk was delivered by Mr. Bharani, Site Engineer. This visit was coordinated by Prof. Vishal B V.

SUMMARY:

Site visiting a real time construction project or design office allows you to develop a greater understanding of how civil engineering theory is put into practice. A clear understanding was made so as to how the constructions have to be made with respect to Building norms and Environmental norms..

Site visit which involve a presentation from the site team, a safety briefing and importance of the project. Many of the concepts were discussed on construction, detailing and design and many more It will give students personal experience of a construction site and exposure to the technical language used at construction site. A complete understanding was made on the Project/Construction with respect to technical specifications.

Resource Person: Mr.Yash N N

Global Technical Marketing Leader

ARUBA & HP Enterprise Company

The speaker of the seminar talk was Mr.Yash N.N and he was introduced by Mrs.Bharathi Gururaj, Asst. professor in ECE department, ACSCE. Mr.Yash is a Global Technical Marketing leader in Aruba and H.P Enterprise Company. His role on TME team focuses on campus switching, network security, network management, network design reference architecture. Aruba Enterprise solution & Digital Industry 3.0 and Industry 4.0 transformation .Prior to joining the TME team he was Aruba engineering section manager in the network test lab. He was responsible for leading qualification, flagship, switching product line, end-to-end to-multivendor solution across networking operating system. He received H.P President Quality award and Enterprise award .He worked for Cisco systems before Aruba.

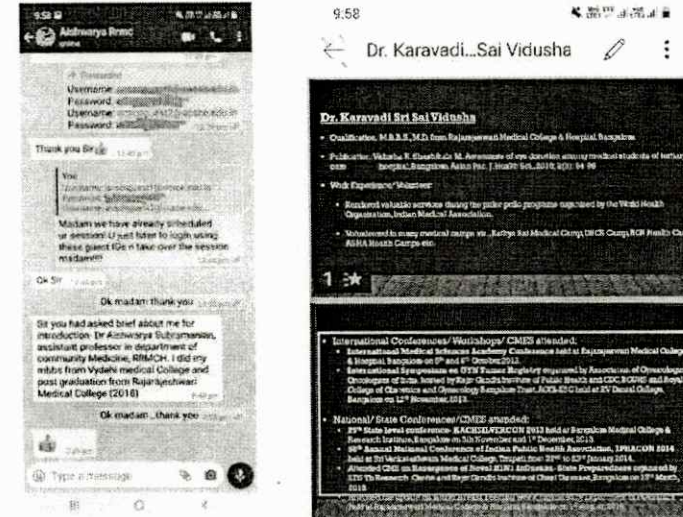

The main goal of Mr.Yash's speech was about the current scenario in digital transformation and its impact on our life all the way from industries 1.0, 2.0, 3.0 and what's going to be the future of industry 4.0.He gave lot of real time examples to understand the situation better. He gave a brief explanation on industrial revolution .The speaker talked about how the computer simulation which will change the future as it is more affordable and takes less time. Industries changes or modifies as it transit into new era. Mr.Yash explained about how the technologies are evolving with respect to industry 4.0.He showed statistical representation of the level of connectivity and how much progress is occurring in each countries compared to the countries that don't have a high amount of connectivity. The impact of 3.0 is so strong that the devices like iphone,android,ipad,kindle,4G,oculus,uber,snapchat and many more came into existence after 2007.

Day 4:

<p>Session Title</p>	<p align="center">Physical Health and its related activities Awareness on COVID 19 and SOP to be followed</p>
<p>Date & Time</p>	<p>06/05/2021 FN/AN Time: 10.00-11.30 AM</p>
<p>Name of the Resource Person (attach. one Page resume)</p>	<p>Dr. K. Vidusha Dr. Aishwarya S</p> 
<p>Key Points Delivered</p>	<p>Dr. K. Vidusha madam has delivered her talk on the topic Physical Health. A person who has good physical health is likely to have bodily functions and processes working at their peak. This is not only due not only to an absence of disease. Regular exercise, balanced nutrition, and adequate rest all contribute to good health. People receive medical treatment to maintain the balance, when necessary. Physical well-being involves pursuing a healthful lifestyle to decrease the risk of disease. Maintaining physical fitness, for example, can protect and develop the endurance of a person’s breathing and heart function, muscular strength, flexibility, and body composition. Looking after physical health and well-being also involves reducing the risk of an injury or health issue, such as:</p> <ul style="list-style-type: none"> • minimizing hazards in the workplace • using contraception when having sex • practicing effective hygiene • avoiding the use of tobacco, alcohol, or illegal drugs • taking the recommended vaccines for a specific condition or country when traveling <p>Good physical health can work in tandem with mental health to improve a person’s overall quality of life.</p> <p>Dr. Dr. Aishwarya S has delivered her talk on Covid-19 Awareness and SOP to be followed. In her talk she stressed on the concepts below.</p> <ol style="list-style-type: none"> 1. COVID-19 is the disease caused by a new coronavirus called SARS-CoV-2. WHO first learned of this new virus on 31 December 2019, following a report of a cluster of cases of ‘viral

IETE Student Forum Inauguration Function

Date: 20-02-2017

Venue: Seminar Hall-1

Time: 10:30 am

The ISF Inauguration function was presided by the **Chief Guest Prof H S Bhatia, Hon. Secretary, IETE Bangalore Center**. He expressed his willingness to help student members in any field of Electronics and Communication.

The program began with an invocation song followed by the address by the **Principal Dr. M S Murali**, wherein he asked student members to actively participate in all the events. He also requested faculty to register for IETE Membership.

The key note address was delivered by **Prof. C Murali, Vice President, IETE, New Delhi**. Professor spoke on "Emerging trends in E & C for better tomorrow", where he stressed on present and future technologies like IoT and 5G, their features and applications. The program was concluded with vote of thanks.

THIRD INTERNAL ASSESSMENT TEST

Max. Marks: 30

SEM: V

Duration : 01 Hr.

Sub. Code: 15EC563/17EC563

Date : 29/11/2019

Subject: 8051 Microcontroller

Note: 1) Answer all Full Questions, selecting at least one questions from each PART
2) Write neat sketches wherever required.

Part A

Question No.	Third Internal Assessment Questions	MARKS	CO's	RBTL	
1	a	Briefly explain the differences between interrupts and polling.	5	CO [5]	L1, L2, L3
	b	Write a program to generate square wave of 5KHz frequency at P1.3 using interrupts in timer0 mode2. Assume XTAL = 22MHz	5	CO [5]	L1, L2, L3
OR					
2	Show an interface of 8051 with a stepper motor drive circuit and write an ALP to rotate it counter clockwise.	10	CO [6]	L1, L2, L3	
Part B					
3	Interface ADC 0804 to 8051 and write an ALP to read analog data and display the converted data on port1	10	CO [6]	L1, L2, L3	
OR					
4	a	Explain interrupt priority register of 8051 microcontroller.	4	CO [5]	L1, L2, L3
	b	Write a C program to serially transmit the message "HELLO" continuously at a baud rate of 9600 using timer1.	6	CO [5]	L1, L2, L3
Part C					
5	With neat interfacing diagram of 8051 to LCD write an c program to send letters 'N' and 'O' to the LCD using time delay.	10	CO [6]	L1, L2, L3	
OR					
6	A switch is connected to pin 2.7 and stepper motor to port 1 write an ALP to monitor the status of switching and i) If SW = 0 Stepper motor should rotate in clockwise direction ii) If SW = 1 Stepper motor should rotate in anticlockwise direction	10	CO [6]	L1, L2, L3
