

ACS College of Engineering

(Approved by AICTE, New Delhi, Govt. of Karnataka & Affiliated to Visvesvaraya Technological University, Belgaum)

Sponsored by : MOOGAMBIGAI CHARITABLE AND EDUCATIONAL TRUST

2.6.2: Attainment of programme outcomes and course outcomes are evaluated by the institution

COs attainment:

Attainment of course outcomes for each course is measured based on the following assessment process:

Step 1: The faculty uses the course outcomes of the respective course available in the course in the evaluation scheme, else prepared by respective faculty, and verified by the respective HoDs.

Step 2: As the percentage of marks (related to each COs) asked in university exam (external exam) and internal exam, the average weightage percent of each CO is measured as an average of external/internal exams for further calculation of direct attainment.

Step 3: Weightage of external and internal examinations marks were distributed based on total marks as per the university curriculum. The class average in respective (External and Internal) examinations was used for further calculation of CO attainment.

Step 4: The Attainment level of CO is measured through syllabus by Direct Assessment Process (DAP) with weightage of (80%) and Indirect Assessment Process (IAP) with weightage of (20%). The DAP is measured into two assessment processes, namely Internal Assessment (IA) with weightage of 30% and External Examination with weightage of 70%. In IA, the assessment tools are Internal Assessment Test (IAT) and Assignment. The weightage of these tools are segregated and recorded by the faculty who handles the subject. In Indirect Assessment process, the University Semester End Examination and course end survey is used as an assessment tool.

The Departments have developed the curriculum taking all the POs into consideration and assuring that the curriculum strongly maps to all the POs. The PSOs are also appropriately framed along with the curriculum development.

The COs are framed as the abilities of the student after completing the course. The framed COs are then mapped with the POs and the PSOs. During the CO-PO/PSO mapping, the strength of mapping is also considered.

Internal Assessment is conducted as per the university academic schedule and student's performance of marks is recorded. At the end of course, course end survey is taken from the respective course students and the values are recorded. The student's performance of the university exam is recorded. In IAT, attainment is measured in terms of actual percentage of students getting the percentage of marks, which is set for the respective courses. In university exam, attainment is measured in terms of actual percentage of students getting pass marks, fixed by the university.

The CO target level is initialized based on previous university exam results of the respective courses. If the target value is attained, the value for next batch is increased by 0.1 from attained value to maximum level of 3. If not, the same value is maintained for the next year.

At the end of the programme, the POs/PSOs are computed using the CO computation value of all the COs that are mapped to a PO/PSO and through Exit Survey. The PO/PSO computation are done using the weighted average of all the COs that are mapped to that PO/PSO. The Exit survey questions are framed by the department to indirectly measure the POs/PSOs.

After the computation of POs/PSOs, a thorough analysis on these attainment levels is done by the department. This analysis includes finding the weak areas towards the attainment of POs/PSOs and a detailed plan of action of various events which help in the further attainment of the POs/PSOs.

Bangalore - 560 074

Faculty: Mrs. Gayatri Joshi
Subject: Virtual Bioinstrumentation
Subject Code: 17BM562 (2019-20-ODD)
COURSE OUTCOME STATEMENT
<p>At the end of the course, students will be able to ...</p>
<p>CO1 Describe the Graphical System Design approach & basic features and techniques of LabVIEW.</p>
<p>CO2 Use the Modular Programming concepts for creation of VIs & employ DAQ assistant for configuration of hardware devices.</p>
<p>CO3 Discuss the basic concepts of DAO Systems, LabVIEW , and BioBench software.</p>
<p>CO4 Describe the LabVIEW and BioBench software for EMG, ECG, and Cardiopulmonary system analysis.</p>
<p>CO-5 Discuss the Medical Device Development Applications for Surgical Video Systems and IV Pumps.</p>
<p>CO-6 Explain the Healthcare Information Management Systems using Information Science and technology</p>

Faculty: Mrs. Surekha Nigudgi
Subject: Biomedical Equipments
Subject Code: 17BM54 (2019-20-ODD)

COURSE OUTCOME STATEMENT

At the end of the course, students will be able to

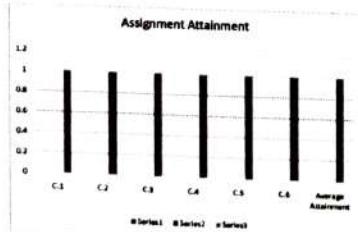

C.1	Define and analyze the ECG, EEG and BP signals.
C.2	Discuss the factors to be considered in the measurements of respiratory and audiometric signals.
C.3	Describe the principle and working of cardiac pacemakers, defibrillators and surgical devices.
C.4	Describe the principle and working of therapeutic instruments like Dialysis, heart-lung, ventilator, lithotripter and incubators.
C.5	Interpret the concepts involved with the measurement of man and Instruments.
C.6	Discuss the physiological effects from electric shocks and maintenance of medical equipment's as per standards.

Donalv
Head of Department
Bio Medical Engineering
ACG College of Engineering
Bangalore - 560 074.
